DRILL 26  }  Restricted areas within the port facility

SCENARIO:
If there are automatic access points with detection equipment, test them for correct operation and check that the alarm actually reaches the control room. Check how the person in the control room reacts to the alarm.

LOCATION:
- Facility – access points with detection equipment

PARTICIPANTS:
- PFSO
- Facility personnel
- Security guards

OBJECTIVES:
- Assure correct operation of the detection equipment and electronic alarms
- Assure correct reaction and compliance with the procedure by the person receiving the alarm
