DRILL 32 \ Monitoring the security of the port facility

Regulation 725/2004: A/14.2 A/14.3 A/14.4 B/16.54.1

SCENARIO:
Test the fixed or mobile lighting necessary for escalating the security level. In consultation with the SSO, all the ship’s lighting may be switched on as well.

CHECKLIST:
- Do all the lights work?
- Check for dark areas: in the facility, in and around Restricted areas within the port facility, around the ships, along access routes
- Check the operation of fixed and mobile lighting
- Check maintenance and repair
- If there is a contract: check the contact details and contact persons for the external company
- Check that a logbook of vehicles and personnel is kept

LOCATION:
- Facility – quayside

PARTICIPANTS:
- PFSO
- Facility personnel
- Security personnel
- Where applicable, SSO

OBJECTIVES:
- Assure sufficient lighting for visibility in all conditions (at night, in bad weather etc.)
- Assure correct operation of all equipment
