### SCENARIO:
Check how familiar security personnel are with the communication equipment. Find out what communication equipment they have: e.g. telephone, mobile phone, PC, walkie-talkies, marine VHF, etc.

### CHECKLIST:
- Communication equipment works and is used correctly
- Is there a maintenance contract?
- Check operation and condition of accessories (e.g. batteries) and backup equipment
- Test the knowledge of alarm-raising codes

### LOCATION:
- Facility – offices – security guardhouse – technical department

### PARTICIPANTS:
- PFSO
- Security guards
- Facility personnel

### OBJECTIVES:
- Assure optimum communication possibilities and skills of personnel
- Assure correct operation of the communication equipment
- Assure correct repair/replacement of defective equipment
